

Special Contract Interruptible Service (MG5)

AVAILABILITY: The SCIS rate or combined interruptible and partial backup firm service is available under this schedule when a customer makes written a request and the Department determines that such requested electric service in the specific customer application will be cost effective to the Department and its customers under the rates, terms and conditions of electric service interruption included in this rate schedule. Service will be supplied from the Utility's three-phase 13,200 volt distribution system for contract interruptible loads of 1,000 kW or more. This schedule is not applicable to resale or shared electric service.

SEASON PERIOD: Periods are defined by the date when the customer's meter is read. The summer season contains read dates from June 1st through October 31st. The winter season contains read dates from November 1st through May 31st.

TERMS OF SERVICE: Service rendered under this schedule is subject to the Department's standard rules and regulations. Agreements under this schedule shall be for a term of not less than 8 years. Service after the eighth year is automatically renewable each year unless cancelled by the Department or customer after 12 months prior written notice.

BILLING DEMAND DETERMINATION: Demand will be determined by demand instruments or at the Department's option by demand tests. The Billing kW Demand for any month is the highest kW demand indicated in any 30-minute interval during that month as adjusted for power factor, but not less than 1,000 kW. During the billing months when customer's electric service is subject to interruption (the days of June 20 through September 10 and November 15 through March 15), 50% of the highest metered kW demand established during the Off-Peak Hours (10:00 P.M. through 7:00 A.M.) that is in excess of the highest metered demand established during On-Peak Hours (7:00 A.M. through 10:00 P.M.) will be excluded from the Off-Peak Hour highest demand. The highest kW demand adjusted for power factor is determined by multiplying the measured highest kW demand times 95% and dividing by the percentage power factor determined.

TERMS AND CONDITIONS OF ELECTRIC SERVICE INTERRUPTION: Electric service provided at this rate schedule is subject to 100% interruption upon demand of the Department during the Seasonal Interruption Periods prescribed herein. If customer purchases Backup Firm Service in accordance with the Backup Firm Electric Rider Provision included in Schedule SCIS, then customer's electric service will be curtailed to a load amount not to exceed the amount of contracted demand for Backup Firm Service.

SEASONAL INTERRUPTION PERIODS:

Summer Interruption Season: For a maximum daily period of each hour between 12:00 noon through 10:00 P.M. for the period extending from June 20th through September 10th of each year, exclusive of weekends and generally recognized holidays.

Winter Interruption Season: For a maximum daily period of each hour between 5:00 P.M. through 9:00 P.M. for the period extending from November 15th through March 15th of each year, exclusive of weekends and generally recognized holidays.

NOTIFICATION OF ELECTRIC SERVICE INTERRUPTION: The Department's Load Dispatcher will notify the customer 24 hours in advance of each day's electric service hourly interruption period during the prescribed Seasonal Interruption Periods. In case of emergencies as determined by the Department, electric service interruptions during the prescribed Seasonal Interruption Periods may be implemented at one-hour notice to the customer.

Implementation of Electric Service Interruption: The Department reserves the right to restrict or limit the terms of implemented interruption to lesser number of days or hours than allowed in this rate schedule based upon content of Specific Service Interruption Agreements between the Department and the customer.

Summer Interruption Season: The Department's implementation of electric service interruption during the Summer Interruption Season Period will be based upon the expectation that the maximum outdoor temperature is to exceed 98° F during the day in which electric service is to be interrupted. Each day's hourly period of interruption will be determined by the Department as dictated by the electric system load, available capacity, and cost of energy supply, but will not be greater than the maximum period of 12:00 Noon through 10:00 P.M. If Backup Firm Electric Service is provided at the terms and conditions of Backup Firm Electric Service Rider Provision and at the Department's sole discretion, customer may elect, if authorized by the Department, not to curtail or interrupt the load to level of Backup Firm Service contract demand and be billed at the additional energy charge authorized by said Rider Provision for all energy used during maximum daily interruption period of 12:00 Noon to 10:00 P.M.

Winter Interruption Season: The Department's implementation of electric service interruption during the Winter Interruption Season Period will be based upon the expectation that the maximum outdoor temperature is to be less than 5° F during the day in which electric service is to be interrupted. Each day's hourly period of interruption will be determined by the Department as dictated by the electric system load, available capacity and cost of energy supply, but will not be greater than the maximum period of 5:00 P.M. through 9:00 P.M. If Backup Firm Electric Service is provided at the terms and conditions of Backup Firm Electric Service Rider Provision and at the Department's sole discretion, customer may elect, if authorized by the Department, not to curtail or interrupt the load to level of Backup Firm Service contract demand and be billed at the additional energy charge authorized by said Rider Provision for all energy used during maximum daily interruption period of 5:00 P.M. to 9:00 P.M.

BACKUP FIRM ELECTRIC SERVICE RIDER PROVISION: Upon written request of the customer and the concurrence of the Department, backup firm electric service will be provided to the customer through the interruptible service meter for essential plant electric requirements during periods when electric service is interrupted.

Backup firm electric service shall be provided upon the following conditions:

1. Backup firm electric service is defined as the maximum 30-minute delivery of electric power measured in kW that the customer may use during implemented electric service interruption periods. The maximum amount of firm electric power delivery shall be the contract demand for backup firm electric service delivery.

2. The customer shall nominate a contract demand for backup firm service and the amount of the nominated contract demand shall be the lesser of the amount determined from provision (a) or (b) stated as follows:

- (a) an amount not to exceed 40% of the customer's expected highest monthly metered demand for interruptible service during a consecutive 12 month period; or
- (b) an amount that results in an implemented total net load interruption (highest monthly metered demand minus nominated contract demand) of not less than 1,000 kW.

3. If customer's actual highest measured 30 minute kW demand during an actual implemented interruption period exceeds the nominated contract demand for two consecutive days, then the highest measured demand shall be the contract demand for a subsequent 12 month period.

Backup firm service shall be provided only on an annual basis each year and shall be billed at the following Net Monthly Rate charge in addition to the Net Monthly Rate charges for Interruptible Service.

EXTRA FACILITIES RENTAL CHARGES FOR INTERRUPTIBLE SERVICE: Upon the written request of the customer and the concurrence of the Department, the Department will provide and maintain Extra Facilities including a stepdown transformer facility from either 13,200 volts to another standard single character primary or secondary voltage and all necessary Utility auxiliary and protective equipment at an agreed upon location at the customer's property. The monthly rental charge for Extra Facilities, in addition to customer's monthly rate for electric service, shall be equal to 1.3% of the Department's total investment in the Extra Facilities provided herein. The Department's metering of the customer's service will be at the Department's option on either the high or low voltage side of stepdown transformer facility, but if metering is on the low voltage side of transformer, said metering will include a loss compensating device to measure the stepdown transformer winding losses.

Special Contract Interruptible Service (MG5)

Available to all customers, effective November 1, 2023

MONTHLY CHARGES

Customer Charge	\$75.00 each month
Demand Charge	\$8.96/kW all demand
Backup Demand Charge	\$8.96/kw of contracted firm demand
Hours Use Energy Charge	0-480 hours use \$0.06110/kWh 480+ hours use \$0.05387/kWh
Backup Energy Charge during Interruption	\$0.05587/kwh
Power Cost Adjustment	See Schedule
Regulatory and Environmental Rider	See Schedule
PILOT/Franchise Fee	As applicable
Sales Taxes	As applicable

Minimum Monthly Bill: The minimum monthly charge shall be the Interruptible Demand and Energy Charges, any Backup Firm Electric Service Rider provision charges and Extra Facility Charge if applicable, plus any applicable PILOT and Sales Taxes.
